

The Cold is Coming!

5 THINGS TO DO NOW TO HAVE A WARM AND COZY HOME

DO A FURNANCE CHECK

Check & upgrade your HVAC system so it's winter-ready and energy-efficient.

PEST-PROOF

Seal gaps, cracks and crevices to keep out unwanted animals and insects. If critters can come in, so can cold air

SEAL DUCTS

Seal the gaps and seams in your ducts that you can access with metal face tape or mastic to help the heat reach your far rooms

UPGRADE INSULATION

Hold in the warm cozy heat that you are paying for with new high-performing insulation.

GET AN ENERGY AUDIT

A blower door test and thermal infrared scan will identify where air and heat are leaking and causing drafts. [Learn More](#)
